Edinburgh Journal of Botany is an international journal of plant systematics and related aspects of biodiversity and conservation science. Contributions relating to plant systematics and allied subjects, including biodiversity, conservation science and phytogeography, will be considered. Papers reporting the results of research that links traditional and modern techniques are especially welcomed. Both full length papers and short communications (i.e. usually no more than two printed pages) are acceptable. All manuscripts will be subject to multiple peer review before publication. Submitted manuscripts should not have been accepted for publication or be under consideration elsewhere.

Manuscripts should be sent in triplicate to: The Editorial Office (Edinburgh Journal of Botany), Royal Botanic Garden Edinburgh, 20A Inverleith Row, Edinburgh EH3 5LR, UK.

There are no page charges. 25 offprints will be supplied free of charge. Further offprints may be purchased through the publisher (e.g. 25 copies of 1–4 pages = £20.50; 50 copies of 9–16 pages = £57.50). No offprints will be available for Short Communications. Colour plates may be included but these will be charged to the author: £500 and £550 for half and full page respectively. Half-tone plates are free of charge.

Manuscripts should be typewritten using double spacing throughout (including references, tables and legends) with wide margins. All pages should be numbered serially, with the title and abstract on the first. Species names should be italicised (or underlined) and should be followed by the authority when first used in the main text. SI (metric) units must be used other than in specimen citations where appropriate. The editors reserve the right to decide that a paper may be treated as a Short Communication.

The title page should include the title, the name(s) and address(es) of the author(s), the abstract, a short running title and up to five keywords (other than those appearing in the title). Authors of scientific names should not be included in the title unless there is good reason. It will be assumed that correspondence and requests for offprints should be addressed to the first author unless otherwise indicated. The Abstract should be concise, informative and intelligible without reference to the main text.

References in the text should be cited by author and publication date: (Long, 1994) or ‘as stated by Long (1994)’. Multiple references should be arranged chronologically. For three or more authors use et al.

In the reference list, references should be typed in alphabetical order and should appear in the following style:

Tables should be numbered in arabic numerals and each should carry a descriptive title above. Each table should be typed on a separate page. The places for insertion of tables in the text should be clearly marked in the margin.

Figures, whether line drawings or photographs, should be numbered consecutively in arabic numerals and referred to in the text thus: (Fig. 1), (Figs 2, 3), (Figs 1–4). Each figure should be marked on the reverse with the author’s name and the figure number. Line drawings and diagrams should be submitted on stout white paper or tracing paper and should allow for one third reduction. A measured scale mark should be included on each illustration to indicate magnification. The places for insertion of figures in the text should be clearly marked in the margin. The page area for figures is 12.5 × 19.5cm to include caption.
Studies on the flora and vegetation of the Golestan National Park, NE Iran. III. Three new species, one new subspecies and fifteen new records for Iran.
H. AKHANI 1

A revision of the genus Tripterygium (Celastraceae). MA JIN-SHUANG, A. R. BRACH & QUAN-RU LIU 33

Two new species of Umbelliferae from Southern Turkey. A. DURAN & H. DUMAN 47

A new Anthemis (Asteraceae) from Saudi Arabia. A. GHAFOOR & T. A. AL-TURKI 55

Conservation of Britain’s biodiversity IV: Filago pyramidata (Asteraceae), broad-leaved cudweed. T. C. G. Rich 61

Rhododendron chilanshanense (Ericaceae), a new species from Taiwan. Y. KURASHIGE 75

Subdivision of Rhytidocaulon macrolobum (Asclepiadaceae). U. MEVE & S. COLLENETTE 79

The genus Colchicum in Turkey. I. New species. K. PERSSON 85

The genus Colchicum in Turkey. II. Revision of the large-leaved autumnal species. K. PERSSON 103

New taxa and combinations of Australian boletes. T.-H. LI & R. WATLING 143

Short communications

A new name for a ginger endemic to Sao Tomé. I. M. TURNER 149

A new record for Bhutan and Sikkim: Yushania yadongensis (Poaceae: Bambusoideae). C. M. A. STAPLETON 149

Book reviews:

The Genus Inga: Botany, by C. E. HUGHES 151

The Ferns of Britain and Ireland, by R. ATKINSON 153

Anatomie der Hymenomyceten. Eine Einführung in die Cytologie und Plectologie der Krustenpilze, Porlinge, Keulenpilz, Leistlinge, Blätterpilze und Rohrlinge, by R. WATLING 155

Supplement to Illustrations on the Flora of the Palni Hills, South India, by C. PENDRY 156

Molecular Tools for Screening Biodiversity, by P. M. HOLLINGSWORTH 157

The Genus Cypripedium, by R. M. BATEMAN 158

The cover illustration, drawn by Mary Bates, is of the diminutive alpine plant Sibbaldia procumbens, named in honour of one of the Royal Botanic Garden Edinburgh’s founders Robert Sibbald. This plant is used, in a stylised form, as the Garden’s official logo.

ACCREDITED WITH THE INTERNATIONAL ASSOCIATION FOR PLANT TAXONOMY FOR THE PURPOSE OF REGISTRATION OF ALL NEW PLANT NAMES
